Continuation of Substance of Interview including description of the general nature of what was agreed to if an agreement was reached, or any other comments: Applicant proposed adding language to the claims to define function. The Examiner suggested defining the clip in terms of elements that constitute the clip and to further define physical distinguishable characteristics thereof, which may include material of the clip. Applicant further proposed recitation of negative limitations, such as "without fasteners." Though, the Examiner did not discount any such negative limitations Examiner did express that positive limitations would better serve to define over the prior art. Nonetheless, further search and consideration would need to be given for any amended language in the claims. Mr. Raring did hint at Applicant's submitting an affidavit asserting commercial success of the claimed gutter clip which affidavit/declaration would be considered upon filing.
